

Requirements

Ticaga requires the latest version of PHP, this is because we pride ourselves on being up-to date with security updates, functions and cool new features.

Minimum requirements:

- PHP: **8.3**
- MariaDB: **10.5.22** // MYSQL: **8.0**
- Ioncube loaders: **13.3.1**
- Composer
- Laravel 11.x
- Lets Encrypt for SSL

Environment:

We recommend AlmaLinux 9 or RockyLinux 9.4 on a Virtual Private server with at least 2GB RAM.
