Upgrading Ticaga Manually

To upgrade Ticaga, simply upload the new files.

```
wget -N https://ticaga.com/latest.zip
unzip latest.zip
```

Run the migration tool to add or update any database tables:

```
php artisan ticaga:upgrade
```

Seed the database with any new content required:

```
php artisan db:seed
```

Re-build Ticaga:

```
npm run build
```
